**DESCRIPTION AND PURPOSE OF CHANGE:**

<input type="checkbox"/> Die Technology <input type="checkbox"/> Wafer Fabrication Process <input type="checkbox"/> Assembly Process <input type="checkbox"/> Equipment <input type="checkbox"/> Material <input type="checkbox"/> Testing <input type="checkbox"/> Manufacturing Site <input type="checkbox"/> Data Sheet <input checked="" type="checkbox"/> Other - Firmware change	<p>This notification is to advise our customers of a firmware upgrade with auto-calibration of comparators related to Vrec.</p> <p>During internal testing and validation, IDT noticed Vrec oscillation during conditions of poor coupling and very narrow range of load currents. It is highly unlikely that the issue would be observed by end customer – in worst case, the device would disconnect safely and restart when correctly aligned. However, we decided to eliminate the issue and to improve the end customer experience, by auto-calibration of the comparators.</p> <p>There is no change to thermal and MSL specification .</p> <p>This is no change to the die technology or process.</p> <p>Upon expiration of this PCN, material with the prior firmware will no longer be available. If you would like to purchase the prior firmware material, a last time buy should be placed with a requested delivery date prior to this PCN expiration. Please communicate this need to your local sales office so that it can be ordered with specific instructions for the prior firmware.</p>
--	--

**RELIABILITY/QUALIFICATION SUMMARY:**

There is no change in die technology/process/datasheet.

**CUSTOMER ACKNOWLEDGMENT OF RECEIPT:**

IDT records indicate that you require written notification of this change. Please use the acknowledgement below or E-Mail to grant approval or request additional information. If IDT does not receive acknowledgement within 30 days of this notice it will be assumed that this change is acceptable.

IDT reserves the right to ship either version manufactured after the process change effective date until the inventory on the earlier version has been depleted.
