**2. Background**

These products have been used by customers for a long time, but in recent years, demand for these sizes have decreased due to technological innovation and changes in the market. Due to the aging of production equipment, it will be difficult to maintain stable supply and quality in the future, so we have decided to discontinue production of these production. With the end of production this time, production items and production lines will be consolidated and abolished to improve production efficiency.

In the future, we will increase the number of our standard size surface-mounted capacitors (aluminum non-solid electrolytic capacitors, conductive polymer aluminum solid electrolytic capacitors, conductive polymer hybrid aluminum electrolytic capacitors).

**3. Schedule**

Last order date: March 2024

Final shipment date: March 2025 (Subject to change depending on production conditions.)

**4. Others**
