4D-display click Compatible Part Numbers

The 4D-display click is an adapter Click™ board that allows easy hardware connection of 4D Systems gen4 Series Intelligent Display Modules to any development board with a mikroBUS™ socket. This includes most development boards from MikroElektronika as well as a number of development boards from other vendors, like the Curiosity Boards from Microchip. In this list you will find all compatible gen4 Series parts with the 4D-display click.
