

New Alternative Versions of Most Popular Commercial IHLP® Inductors Featuring Shorter Lead Times of 10 Weeks

Product Benefits:

- Lead times of 10 weeks
- Quicker alternatives to Vishay's 10 best-selling series of standard commercial IHLP inductors that currently have extended lead times
- Lineup consists of over 100 inductor part numbers in the 1616, 2020, 2525, and 4040 case sizes
- Equivalent in fit, form, and function to standard commercial IHLP inductors, but may show slight deviation in datasheet parameters

Market Applications:

- Energy storage in DC/DC converters and high current filtering
- Notebooks, desktop PCs, and servers; high current point-of-load converters; graphics cards; DC/DC converters for distributed power systems and FPGAs; and telecom infrastructure

The News:

To provide faster access to its most popular commercial IHLP low profile, high current inductors, Vishay Intertechnology introduces alternative versions with shorter lead times of 10 weeks.

- Manufactured at a separate facility
- Packaged in a 100 % lead (Pb)-free shielded, composite construction that reduces buzz noise to ultra low levels
- High resistance to thermal shock, moisture, and mechanical shock
- RoHS-compliant, halogen-free, and [Vishay Green](#)
