Reason: Consolidation of product portfolio

Description: T-Global Technology's new TG-A series of thermal pads are the next generation of thermal interface materials utilising the latest technology and processes. This new generation of products supersede some of the older materials and has rendered them redundant. Therefore T-Global have taken the decision to remove these older products from distribution to discourage their use in new projects.

T-Global will continue to support PC96, TG4040SA, TG832, TG997, TG996 and TG994 beyond the end of 2021 for specific applications and existing projects. However, we encourage customers to sample and approve the new materials wherever possible.

If the recommended replacement part is not shown or is un-suitable for your project, please do not hesitate to contact Digi-key or T-Global for alternative suggestions.

Should you require more details or wish to discuss this please do not hesitate to contact us at sales@tglobaltechnology.com.

Last Buy: 30th June 2021
