

Dear Magnasphere Customer,

We are excited to announce that we have made significant design improvements to our ¾" recessed contact. Effective immediately, the MSS-20CL (closed loop) series is being replaced by our MSS-201C and the MSS-19CL (open loops) series is being replaced by the MSS-210C.

We are also replacing our 1" recessed contacts with our MSS-300C series parts. The MSS-26CL (closed loop) series will be replaced with the MSS-301C and the MSS-25CL (open loop) series will be replaced with the MSS-310C.

Below is a list of the part numbers that will be discontinued and the parts that will replace them.

The discontinued parts are being phased out so they will still be available while supplies last but once they are out of stock they will not be restocked and we will ship the replacement parts instead.

The data sheets for the MSS-200C series (¾" diameter) and the MSS-300 Series (1" diameter) are attached.

Both the MSS-200C and MSS-300C series recessed contacts are the lowest profile devices on the market and allow for installation in tight spaces where older style contacts won't work. The MSS-200C series (¾") is offered with single or dual alarm contacts, the MSS-300C series (1") offer single, dual, or TRIPLE alarm contacts that allow multiple systems to be serviced from a single contact. Both Series are also available as a fire classified models, can be installed in steel doors, offer optional embedded EOL resistors and come in a variety of colors.
