Withdrawal of aluminum electrolytic capacitors with NMP from Gravataí

To streamline the product range, the following EPCOS single-ended and axial-lead/soldering star capacitors with NMP produced in Gravataí/Brazil are being withdrawn without replacement. For alternative parts please contact your regional sales contact.

The additive N-methyl-2-pyrrolidone (NMP; CAS 872-50-4) is no longer necessary because modern production plants have significantly improved the electrolyte mixing process. NMP was introduced as an additive to the solvent system in some low voltage electrolytes to improve solubility and to speed up the electrolyte mixing process. NMP is listed as a restricted substance in Annex XVII of the REACH Regulation (REGULATION (EC) No 1907/2006).
