## Notation used in this manual

 <b>WARNING</b>	Indicates information that, if ignored, could possibly result in serious personal injury or even death due to incorrect handling.
 <b>CAUTION</b>	Indicates information that, if ignored, could possibly result in personal injury, physical damage, or damage to equipment due to incorrect handling.
<b>Attention</b>	Indicates important information about the printer.
<b>MEMO</b>	Indicates additional information and points which may be useful to know regarding a topic.
	Indicates a place with more detailed information.
	Shows an image of the label to be used as an example.
	Indicates the buttons on the printer.
<b>"Name"</b>	Indicates the menu items, messages shown on the display, or the name of a manual. Example: "On", "Start print?"

Read this document carefully to use this product safely and correctly. If your product is faulty, please read the warranty card on the website. If you require further assistance, contact Panduit customer service.

Please also visit us at [www.panduit.com](http://www.panduit.com) for additional support. You can also download the latest version of this Operator's Manual from the website.

# Specifications

## Body

Dimensions (W x D x H)	Approx. 5.35 x 11.73 x 3.54 (inches)	
	Approx. 136 x 298 x 90 (mm)	
Weight	Approx. 2.45 lb	(excluding batteries, tape cartridge)
	Approx. 1,110 g	

## Usage conditions

Operating temperature	5 to 35 degrees C
Storage temperature	-10 to 55 degrees C

## Supported tape width

6 mm, 9 mm, 12 mm, 18 mm, 24 mm
---------------------------------

## Power supply

### Battery

Li-ion battery (C52CE97010) x 1 / AA alkaline battery x 6
---

### AC adapter

Type	AST1116Z2-1
Manufacturer	Seiko Epson Corp.
Input	100-240 V AC, 0.4 A, 50-60 Hz (dedicated adapter, power cable only)
Output	11 V DC, 1.64 A
Total output power	18.04 W

## Li-ion battery specifications

### Ambient temperature

During operation	0 to 40 degrees C	
Charge	0 to 40 degrees C	
During storage	Less than 1 month	-20 to 50 degrees C
	Less than 3 months	-20 to 40 degrees C
	Less than 1 year	-20 to 20 degrees C

### Charging information

Nominal specifications	Charging current (Std.)	1.0 A
	Charging voltage (Std.)	8.05 V
	Charging time	Approx. 3 hours
Charge limits	Battery pack model	C52CE97010
	Maximum charge current, A	1.0 A
	Maximum charge voltage, V	8.4 V

### Rated time when using alkaline batteries

Rated operating time / Rated resting time	0.5 h / 1.0 h
---	---------------

### Compliance/Safety regulation

For more information, see Important Safety sheet.

# Troubleshooting

## ■ Messages

This section explains the remedies when the following messages appear on the display.

Check battery Charge Li-ion!	The battery has run out of power. Connect the AC adapter to the printer and charge the battery. For details,  "Charging the Li-ion battery"
Check battery Change alkaline	The batteries have run out. Turn off the power and replace all batteries with new ones.
Cover open!	Top cover is open. Close the top cover.
Insert tape	Check if the tape cartridge is loaded or correctly set. For details,  "Installing a tape cartridge"
Check tape cartridge	The loaded tape is not supported. Insert a correct cartridge.
No more sequence No.!	Only up to 2 sequence numbers can be inserted.
No more barcode!	Only up to 2 barcodes can be inserted.
QR CODE too big!	Perform either of the following: Use a wider tape. Reduce the text or cell size. Lower "ECC Level".
Overheated!	The printhead is overheated. Turn off the power and remove the tape cartridge, then leave the printer until it cools down.
Trash at slot Remove trash	There is tape remaining in the tape eject slot. Remove the tape.
Remove cut tape	Unable to start printing because there is cut tape remaining in the tape eject slot. Remove the tape from the tape eject slot.

## ■ Problem

### Unable to charge Li-ion battery

Is the Li-ion battery correctly installed? Check that the Li-ion battery is correctly installed.
Is the AC adapter securely connected? Connect the AC adapter and the power cable firmly to the power socket of the printer, the AC adapter connector and the outlet.

### Unable to detect the tape correctly

Is the tape cartridge correctly installed? Check that the tape cartridge is correctly installed.
Is the label for detecting the tape cartridge clean? If not, wipe the dirt off with a soft cloth.
Is the detection sensor of the printer clean? If not, wipe the dirt off with a soft cloth.

### MEMO

If none of the above has solved the problem or the symptom is other than the above, contact Panduit Identification Technical Support.

## 1. Installing the Li-ion battery

Before using the printer for the first time, charge the Li-ion battery (C52CE97010). Read also the safety precautions for the rechargeable battery described in this manual.

For details on handling the Li-ion battery, refer to the manual included with the battery.

### ⚠ WARNING

Be sure to use the dedicated Li-ion battery (C52CE97010). Using a battery other than the one specified may cause fire, explosion, leakage, overheating or other damage.

### ⚠ CAUTION

When disposing of used batteries, make sure to follow the regulations.

### 1. Open the battery cover.

### 2. Install the Li-ion battery in the correct orientation.

### 3. Close the battery cover.

## ■ Charging the Li-ion battery

You can charge the dedicated Li-ion battery (C52CE97010) with the printer.

To charge the battery, connect the AC adapter to the printer with the Li-ion battery installed.

### MEMO

- The Li-ion battery cannot be charged while printing.
- When the power of the charged Li-ion battery seems to run out quickly, replace it with a new one.
- There is likely to be a charging error or battery error in the following cases. Contact qualified service personnel.
  - The charge LED flashes during charging.
  - New Li-ion battery takes significantly longer to charge than the estimated charging time (less than 3 hours).

■ **Using alkaline batteries**

You can use alkaline batteries instead of the Li-ion battery. When using alkaline batteries, install them in the correct orientation.

**CAUTION**

When you have printed continuously for 30 minutes using alkaline batteries, leave the printer for at least one hour to allow the batteries to cool down.

■ **Connecting the AC adapter**

Connect the AC adapter as shown below.

■ **Connecting the Computer**

1. **Connect the USB cable to the printer.**
2. **Connect the other connector of the USB cable to the computer.**

## 2. Installing a tape cartridge

### ⚠ CAUTION

- Make sure that the power is turned off.
- Be sure to use the specified tape cartridge.
- Make sure the top cover is closed firmly.
- If you opened the top cover while a tape cartridge is installed, check that the tape end is put into the tape eject slot before beginning operation.
- Take care to keep the label for detecting the tape cartridge and the sensor of the printer clean. Otherwise, tape may no longer be detected correctly.
- Do not touch the sensor directly with your fingers.

### 1. Rewind the ink ribbon if needed.

Use a pen or a pencil.

### 2. Open the top cover.

Top cover

### 3. Install a tape cartridge.

Put the tape end into the tape eject slot.

### 4. Close the top cover.

## 6. Attaching label

### 1. Peel off the backing paper.

### 2. Attach the label and rub it firmly.

#### CAUTION

Depending on the environment where you use labels and the nature of the adhered surface, the labels may be peeled or discolored, and the adhesive may remain on or damage the adhered surface. Be sure to check the environment and the nature of the adhered surface before use. Panduit Corp. takes no responsibility for any damage or loss due to the above mentioned causes.

## 7. Turning the power off

### 1. Press .

The characters you have entered in the current session are stored even after the printer is turned off. They are displayed when it is turned on again.

### 2. Open the battery cover and then remove the Li-ion battery.

If the AC adapter is connected, disconnect the AC adapter from the printer.

#### CAUTION

- "Powering off." is displayed while turning off this printer. Do not remove the Li-ion battery or disconnect the AC adapter until this message disappears.
- If you are not going to use the printer for a long period of time, remove the batteries (Li-ion battery or alkaline batteries), disconnect the AC adapter, and remove the tape cartridge from the printer.

# Customizing Labels

## Label Functions

A label featuring a standard 1D barcode with the number '123456789' printed below it, and a square QR code positioned below the barcode.

Barcode label

A label with a square icon containing a circle and a diagonal slash, followed by the text 'ABC'.

Label with symbol

Three individual labels arranged horizontally, each containing the text 'A-1', 'A-2', and 'A-3' respectively.

Serialized labels

A single label containing three distinct sections, each with the text 'CN01', 'CN02', and 'CN03'.

Advanced serialized labels

Two labels, both containing the text 'ABC'. An arrow points from the first label to the second, indicating a change in format or style.

Format/Style

Three labels, each containing the text 'ABC'. The font size of the text increases progressively from left to right.

Font size

Two labels. The first contains 'ABC' in a standard horizontal orientation. The second contains 'ABC' rotated 90 degrees counter-clockwise.

Text orientation

A label containing the text 'ABC'. A horizontal dimension line is drawn above the text to indicate its length.

Length

A label containing the text 'ABC'. Dimension lines are shown above and below the text to indicate the margins.

Margins

A diagram showing a sequence of labels. The first is 'A-1'. The second is 'A-1' with a table of data: 'No.01', 'No.02', 'No.03' in the first column; 'USB A type', 'USB B type', 'LAN' in the second column. An arrow points from the first label to the second, indicating the addition of a page.

Adding page

A label containing the text 'ABC' in a significantly larger font size.

Large label

Two labels. The first contains 'ABC' mirrored horizontally (appearing as 'CBA'). The second contains 'ABC' in its normal orientation.

Mirrored text label

Three labels, each containing the text 'ABC', followed by an ellipsis '...' to indicate repetition.

# Terminal Block Mode

## Creating Labels for Terminal Block

You can create labels optimized for terminal blocks by setting the pitch length and label length.

1. Press + .
2. Select the length type and then press .  
In this example, we will select "Pitch".  
**Pitch:** Sets the length by pitch length.  
**Label:** Sets the length by label length.
3. Enter the pitch length and then press .
4. Enter the terminal number and then press .  
In this example, we will enter "03".
5. Select the type of separator with / and then press .  
In this example, we will select "Line".
6. Select the orientation with / and then press .  
In this example, we will select "Vert.2".  

<b>Hori.</b>	607A	608A	609A
<b>Vert.1</b>	607A	608A	609A
<b>Vert.2</b>	607A	608A	609A
7. Enter the text.
8. Press .

## Creating Labels for Patch Panel NETWORK

You can create the optimal labels for your patch panel by setting the label length and number of ports.

1. Press NETWORK.
2. Select "P.Pan/F.Plade" with ▲/▼ and then press ENTER.
3. Select the length type with ▲/▼ and then press ENTER.  
In this example, we will select "Ports".  
**Ports:** Sets the length by port length.  
**Label:** Sets the length by label length.
4. Enter the port length and then press ENTER.  
Setting range: 0.10 to 11.81" (0.25 to 30.00 cm)
5. Enter the ports number and then press ENTER.  
In this example, we will enter "3".  
Setting range: 1 to 50
6. Select the type of separator with ▲/▼ and then press ENTER.  
In this example, we will select "Line".

7. Select the orientation with ▲/▼ and then press ENTER.

In this example, we will select "Hori."

8. Enter the text.  
You can create labels with sequence numbers.  
For details, see "Creating Labels with Advanced Serialization"
9. Press Multi-Function.

## Creating Labels for 66-Block NETWORK

You can create labels for 66-Block so that large numbers of connectors can easily be identified.

1. Press NETWORK.
2. Select "66-Block" with ▲/▼ and then press ENTER.
3. Select the length type with ▲/▼ and then press ENTER.  
In this example, we will select "Ports".  
**Ports:** Sets the length by port length.  
**Label:** Sets the length by label length.
4. Enter the port length and then press ENTER.  
Setting range: 0.10 to 11.81" (0.25 to 30.00 cm)
5. Enter the ports number and then press ENTER.  
In this example, we will enter "4".  
Setting range: 1 to 50
6. Select the type of separator with ▲/▼ and then press ENTER.  
In this example, we will select "Line".

7. Select the orientation with ▲/▼ and then press ENTER.

In this example, we will select "Hori."

**Hori.** 607A 608A 609A

**Vert.1** 607A 608A 609A

**Vert.2** 607A 608A 609A

8. Enter the text.  
You can create labels with sequence numbers.  
For details, see "Creating Labels with Advanced Serialization"

## Creating Labels for 110-Block NETWORK

You can create labels to identify at a glance the numbers for the wires or pins connected to a 110-Block.

1. Press NETWORK.
2. Select "110-Block" with ▲/▼ and then press ENTER.
3. Select the blocks type with ▲/▼ and then press ENTER.

In this example, we will select "4pairs".

**Blank:** Creates a table of two rows and one column.

4. Select the text type with ▲/▼ and then press ENTER.

In this example, we will select "Pins".

1	4	8
25	28	32

1	2
7	8

**Pins**

**Seri.**

**Blank**

5. Enter the upper count and then press ENTER.  
In this example, we will enter "1".
6. Enter the lower count and then press ENTER.  
In this example, "25" is entered automatically.
7. Enter the label length and then press ENTER.  
Setting range: 0.39 to 39.36" (1 to 99.99 cm)
8. Press HELP.

# Customizing Labels

## Creating Barcode Labels

### MEMO

- You may not be able to add a barcode depending on the label type you create.
- Only up to two barcodes can be inserted in one label.

Supported barcode types:

EAN-8, EAN-13, CODE128, CODE39, QR CODE, ITF, CODABAR, UPC-A, UPC-E

1. Press .
2. Select an item with / and press .  
Move on to the next options until the setting is complete.
3. Enter the alphanumeric characters for the barcode and then press .
4. Press .

## Creating Labels with Symbols

1. Press .
2. Select a category with / and press .
3. Select a symbol with / and press .
4. Press .

## Creating Serialized Labels

ADV.  
123 SERIAL

Up to four digits including numbers (0 to 9) or alphabet letters (A to Z) can be entered.

### MEMO

Printing will not continue from the next sequential number even if is pressed again after printing has completed. Printing will start from the first label set in the number sequence.  
To continue printing from the next sequential number, reset the start value of the first label to the next sequential number.

### Ex

1. Press .
2. Enter the start value of the sequential numbers and then press .  
In this example, we will enter "0001".
3. Enter the end value of the sequential numbers and then press .  
In this example, we will enter "0005".
4. Enter the increment value and then press .  
In this example, we will enter "2".
5. Press .  
One set of the set labels will be printed.

## Creating Serialized Labels with Copies

1. Set the sequential numbers.  
 "Creating Serialized Labels"
2. Press + .
3. Select "Print copies" with / and then press .
4. Enter the number of print copies and then press .  
In this example, we will enter "2".
5. Select "Start print?" with / and then press .  
Printing starts.

### MEMO

When "Collate" under "Print copies" is set to "Yes", labels will be sorted and printed.

## ■ **Creating Serialized Labels with Collate function**

When printing serialized labels and using copies, the order of the labels can be changed. The default setting of the "Collate" function is "No".

Example: With the settings Start: 1, End: 3, Increment: 1, the labels will be printed in three sets.

Collate: No

1	1	1	2	2	2	3	3	3
---	---	---	---	---	---	---	---	---

Collate: Yes

1	2	3	1	2	3	1	2	3
---	---	---	---	---	---	---	---	---

1. Press  + .
2. Select "Collate" with / and press .
3. Select "Yes" with / and press .

## Setting the Format and Style (Text Options Menu)

### Procedure for setting

**1. Place the cursor.**

Place the cursor on the left of the characters to which you want to apply a function.  
If you want to apply the function to a specific line or block, confirm that the cursor is in the line or block.

**2. Press .**

Example: To apply "Bold & Italic"

**3. Select "Bold & Italic" with / and press .**

**4. Select "B + I" with / and press .**

**5. Select an area to which you want to apply the function with / and press .**

When "Character" is selected, the function is applied to all characters on the right of the cursor.

### MEMO

The setting items displayed when you press  differ depending on the label type you create.

### Text Options menu

You can customize your label by setting the following.

#### Layout

*Left, Center, Justify, Right*

Adjusts the layout when multiple lines are used.

#### Frame & Table

Decorates the text with a frame or inserts a table.

#### Style

*Outline, Normal, Shadow, S+O*

Applies a character style to text.

#### Char. spacing

*None, Narrow, Normal, Wide*

Sets the inter-character spacing.

#### Border & Line

*Strikeout, Underline, None, Border, Round brdr*

Applies border, underline etc. to text.

#### Char. Width

*Smaller, Small, Narrow, Normal, Wide*

This allows you to change the width or height of characters.

# Saving Frequently Used Labels

By saving frequently used labels, you will be able to easily recall and print from them next time. Up to 100 labels can be saved.

## ■ Saving a label

1. Press
2. Select "Save" with / and press
3. Select a number that is available with / or the number keys and then press .  
The screen to enter the file name appears.
4. Enter the file name and press .  
The file name can contain up to 10 characters. The following characters can be used.  
0 to 9, A to Z, a to z, space, ! @ # \$ % ^ & \* ( ) - = + [ ] { } ; : ' " , . < > / ? \ ` ~ | \_  
The registration confirmation screen appears.
5. Confirm the registration number and then press .

## ■ Recall the saved label

1. Press
2. Select "Recall" with / and press
3. Select a file name with / or the number keys and then press .  
The recall confirmation screen appears.
4. Confirm the file name and then press .

### MEMO

Information of the label, including information of the tape in use, is saved in the file. Therefore, if the specifications of the tape set in the printer differ with the tape information saved in the file you want to recall, such as the type of tape, etc., an error message will appear. Switch to a tape with specifications that match the information in the saved file.

## ■ Deleting the saved label

1. Press
2. Select "Delete" with / and press
3. Select a file name with / or the number keys and then press .  
The deletion confirmation screen appears.
4. Confirm the file name and then press .

# Changing the Printer Settings

## Auto cut

### Auto cut:

Sets whether or not to cut automatically.

### Half cut:

When "Auto cut" is set to "On", the "Half cut" function is available. "Half cut" will cut through just the label material, but not the liner material, to make the label easy to remove.

## Print density

Sets the print density.

Print density can be adjusted to improve print quality, if needed.

## Drop stop

This function will hold printed labels in place until they are removed. After being removed, the next label will begin printing automatically. This pause function stops the printed labels from dropping out of the printer and holds them for easy removal.

When printing multiple copies, printing of the second or later labels starts each time you remove a printed label. This function is only available when the label length is 1.1 inches (28 mm) or more, "Auto cut" is set to "On", and "Half cut" is set to "Off".

### MEMO

If you perform continuous printing with the Drop stop function enabled, printing may not be automatically resumed after you take out the printed tape. In such a case, open and close the top cover and choose "Print restart".

## Backlight

Sets the display backlight to On or Off.

## Language

You can select the language shown on the display from the following:

*Dansk, Deutsch, English, Español, Français, Italiano, Nederlands, Norsk, Português-Br, Português-EU, Suomi, Svenska, Türkçe*

## inch/cm

The unit of length used to indicate the label size can be switched between inch and cm.

### MEMO

**Version:** The printer firmware version number.

## Procedure for setting

1. Press .
2. Select the desired function with / and press .
3. Select the desired item with / and press .
