30W Power Delivery for Laptops

Passport 30W can deliver 30W of power through its USB-C port, fast charge your USB-C devices, including MacBook, iPad, iPhone, portable chargers, Nintendo Switch, cameras and more. Passport 30W can fast charge iPhone X up to 50% in 30 mins.

| Power Five Devices at Once

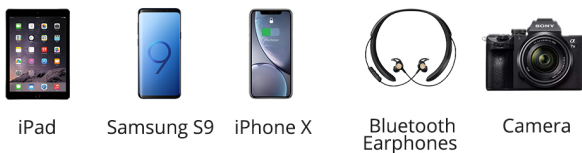

Traveling comes with a unique set of demands, including the need to power and charge several devices in a limited amount of space. Smaller travel adapters can only accommodate two or three devices at a time. Passport 30W has a USB-C port, three USB-A ports, and a multi-region AC output, charging up to five devices all at once.

| Worry-Free Innovation, Auto-Resetting Fuse

Passport 30W eschewed the rustic charm of having to fix your own electronics in favor of an auto-resetting fuse. If too much current is drawn, the circuit will temporarily stop the flow of electricity, resuming again after a few seconds. Utilizing aerospace technology, the auto-resetting fuse (patent pending) allows Passport 30W to recover from overloads without service or replacement up to 10,000 times.

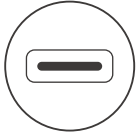

| All-in-One Convenience

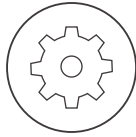

Passport 30W has US / UK / EU / AU plugs all-in-one, compatible with outlets and plugs in over 200 countries and regions. Easy to pack, easy to unpack, and easy to use. Simply press and slide the buttons to select the appropriate connector with just one hand.
