**Key Features** 

Up to 5000W power rating

Aluminium enclosure

Vibration resistant

**Applications** 

**Power supplies** 

**Inverters** 

Servo Motors and Drives

Warehouse Automation

Electrical systems in difficult environments

The CJH Series of resistors are an economical and compact aluminium housed resistor with good electrical stability and reliability. With power ratings up to 5000W they are suited to a range of electrical circuits including power supplies inverters and servo systems. With very good durability and mineral filled construction they are particularly good for braking and other pulse applications.
