

Product Change Notice

PCN#: EE-PCN20004

04/10/2020

CLASSIFICATION OF CHANGE:

Voltage rating increase on HHJ and HHI fuse holders

DESCRIPTION OF CHANGE:

| Part Number | Voltage Rating | |
|-------------|----------------|------|
| | Previous | New |
| HHI-A-R | 32V | 250V |
| HHI-B-R | | |
| HHJ-A-R | | |
| HHJ-B-R | | |
| HHJ-C-R | | |

REASON FOR CHANGE:

Through continuous improvement efforts, Eaton has achieved a higher voltage rating for its HHI and HHJ family of fuse holders. These families can now be applied in more applications due to this increase in voltage rating.

EXPECTED INFLUENCE ON QUALITY, RELIABILITY, AND PERFORMANCE:

Other than the increase in voltage rating, there will be no effect on the quality, reliability, or performance. There are no changes to form, fit, and function of the devices.

PARTS FAMILIES AFFECTED:

HHI and HHJ in-line fuse holders in both standard and bulk packaging. See table above for the specific base part numbers. The latest datasheet is available [here](#).

TIME SCHEDULE:

This change takes effect immediately.

SAMPLE AVAILABILITY:

Available upon request
