TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

**General Product Description**

This PCN will initiate the Part Discontinuance / Obsolescence of the 832, 832M1, 834, 834M1, 834HT, 52A, 1200M30, 1207, 1207F and 1210F accelerometer families.

**Description of Changes**

Obsolete all active part numbers of the 832, 832M1, 834, 834M1, 834HT, 52A, 1200M30, 1207, 1207F and 1210F accelerometer families. Extensive part number list to be discontinued is detailed below. A 9 month LTB offer will be extended to existing customer base.

**Reason for Changes**

The 832/834 family are being upgraded and replaced by the new 830M1 series which offers both performance and form factor improvement designed to existing VOC from 832/834 customers. The model 1207/1207F family is being obsoleted since it is a redundant offering and our 1201/1201F series are preferred for crash testing. Model 1200M30 is being obsoleted due to custom cable no longer being offered by supplier.
