USB CONNECTOR CHANGE NOTICE, WITH DATE CODES 20/02 AND LATER

CnC Tech is notifying you that we changed how we are manufacturing our USB connectors, tray packaging only.

All of USB connectors are now migrated into the new manufacturing process.

These will continue to mate with the same industry standard parts they have, but there will be some minimal changes in the body of the connectors as well as some slight tolerance changes due to the manufacturing process.

All dimensional and tolerance changes are shown in the comparison drawings placed on our web page.
