Product/Process Change		☐ Prod	☐ Product Termination		
		☑ Internal Update			
-	4 CT ()				
Description and Purpose of Change(s):					
The datasheet will be updated to show the saturation current specification at 14A, the operating					
		iding temperature rise and	also show note for custo	mer to tie	
terminals 1+2, 3+4, 7+8+9 and 10+11+12 on PC Board.					
Impact on Form. F	it, Function, Quality o				
		quality or reliability as the			
There is no impact to	o the form, fit, function,				
There is no impact to of the transformer. T		odated to include additiona			
There is no impact to					
There is no impact to of the transformer. T					
There is no impact to of the transformer. T transformer.	he datasheet is being up	odated to include additiona	al specifications for the e	xisting	
There is no impact to of the transformer. T transformer.	he datasheet is being up		al specifications for the e	xisting	
There is no impact to of the transformer. T transformer. Changes will be	The datasheet is being up implemented on a	odated to include additional	ith date / date code	xisting: _ND	
There is no impact to of the transformer. T transformer. Changes will be	The datasheet is being up implemented on a	odated to include additiona	ith date / date code	xisting: _ND	
There is no impact to of the transformer. T transformer. Changes will be The following	implemented on a order (s) may be aff	odated to include additional product starting we fected by the above ch	ith date / date code ange (s) being made	: _ND
