Braided Stainless Steel, Pre-Rounded For Installation Ease

Stainless Steel sleeving is used in applications such as expansion joints, where constant movement and high temperatures require a flexible, indestructible covering.

STAINLESS STEEL (SSN) braid looks great in any application and is as strong as steel. Now, you can take any stock or custom hose, slip a length of Flexo Stainless over it, hide the cut ends under your clamps and have the same look and protection as custom overbraided hoses at a fraction of the cost.

Brass Beauty

Techflex FLEXO BRASS (MBB) can be a useful and beautiful part of your next project. The decorative features of brass are obvious, but many people don't know that brass is actually an alloy of copper and zinc. Our brass is designed for both looks and functionality and can be adapted to create custom hoses and brake lines. Designers and engineers may also use our brass braid for its natural antimicrobial and germicidal properties. Contact with our Brass Braid can kill harmful microorganisms within minutes. Brass Braid has been used in "steampunk" creations of all kinds to bring the hoses of the industrial revolution back to life today.
