Description of change	<p>The 24" RJ45 10pin Cable Legs used on various Digi device and terminal server products are being discontinued. There are many options for customers to convert from our Digi 10pin RJ45 pinout. We are recommending that customers use the 48" version of these cable legs or the mod-tap adapters that are a cost effective way to customize the length of the serial cable from the Digi unit to their device.</p> <p>This is an ongoing effort to streamline our product offerings to focus on consistent product availability while maintaining our high quality.</p> <p>All LTB purchase orders are NCNR (non-cancellable/non-returnable).</p> <p>There is limited availability of these products. Submit orders as soon as possible to ensure availability.</p> <p>Standard warranty policy will apply to all LTB purchases.</p>
