

Subject: NOTICE OF PRODUCT CHANGE FROM DLP DESIGN

Due to unforeseen issues with an overseas supplier, the DLP-USB232M-G is currently undergoing a redesign. Going forward, the newer version (which will be called the DLP-USB232M-G2) will be produced in the U.S. These modules will not be available for another 8 weeks or so, and your pricing will remain the same.

****Any pending or future orders for the DLP-USB232M-G will be fulfilled with the DLP-USB232M-G2.****

From a technical standpoint, the new version will have the exact same pinout (electrical interface) and mechanical design with the exception that the PCB will be slightly wider. The I/O pins will fit perfectly into any PCB previously designed for the original DLP-USB232M-G.

We appreciate your patience while we effect this transition.

DLP Design, Inc.
