

Category 5e Connectivity

October 13, 2020

End of Life – 5e Jacks, 5e Panels and 5e Cables

HellermannTyton Americas will be withdrawing from the CAT 5e market and will completely cease to manufacture and offer connectivity products under the Category 5e standard.

HellermannTyton will continue to develop and support Category 6 and Category 6A connectivity.

Reasoning:

- The use of CAT 5e has been on the decline globally for several years due to increased data consumption, high bandwidth networking needs, wireless access points and newer smart device implementation.
- The vast majority of HellermannTyton's customer base have switched to CAT6 or CAT6A connectivity where copper cabling is required.
- HellermannTyton has made huge strides in bringing purpose designed solutions to market for the Data Center, Broadband, FTTX and PON markets. We are committed to continually look towards the future to support copper and fiber networking and connectivity needs.
- Industry trends indicate that CAT 5e systems will not form a part of the future networking roadmap. US installation standards strongly recommend a minimum of CAT 6 to be used for new installations and connected/smart building upgrades, home and office networks will follow.
- Our focus remains on bringing the most relevant and innovative connectivity solutions to market.

Products Affected:

Category 5e RJ45 Jacks

- 12 colors, 1-piece and 50-piece packaging

Category 5e Patch Panels

- 5 straight and 2 angled

Category 5e Wiring Blocks

- 8 kits and 3 panels

Category 5e Patch Cords

- 7 colors, 46 items

Timing

- Notice period begins immediately
- Orders will be accepted up to and through Tuesday December 15th, 2020

Warranty

- Warranty for previously installed and/or registered products or systems will remain warranted throughout the warranty period specified
- Products purchased up through the EOL deadline will be warranted as specified

In the event connectivity products require replacing after CAT 5e production has ceased, the connectivity will be replaced with the equivalent CAT 6 product
