Distribution:	Active and Contract Customers			

Subject:

Product Plating Change of Minitex Shrouded Vertical Headers.

Nature of Change:

Minitex headers in two walls housing are still supplied in full gold plated version. As standardization of the range and in order to respond to the today standard of selective gold plating to avoid bath pollution and to have better solderability, FCI decided to change full gold plating to selective gold plating. Moreover, FCI will thus be able to maintain product prices at current price level even though material prices increased considerably during last months.

If full gold plating is still mandatory, FCI offers full gold plating with new part numbers. Please refer to the plating option on the drawing.

Implementation Date:

July 20,2007

Affected Part Numbers:

See attached list.

Alternative Products:

Full gold plating will be with new part numbers.
