

Change Notice DB, EB, M2B, MB2000, MB24, MB25 Series

Change of Plunger Dimensions

Type of Change:

- Engineering Part Number
- Product Appearance

The following series will have modifications to the diameter and the end length of the plungers: DB and EB; M2B with B plunger; MB2000 with L plunger; MB2400 snap-in mount; MB2500 bushing, bracket, and snap-in mount. This change will effect both standard and custom products for each of these series. All of the caps previously used will still fit the plungers.

Before Change	After Change

The outer diameter of the plunger will be slightly reduced. The dimension of the end length will be increased, but the overall length will not be effected.

Notes

There are no other changes to the plunger or switch specifications.
 The same caps may be used after changes to the plunger.
 Contact the factory if more details are needed.

Effective Date

Changes to DB, EB, M2B, MB2000, MB2400 and MB2500 plungers will be effective February 2015.
