Dear Valued Customer,

The Altivar 212 and S-Flex variable speed drives are currently active products, serving our customers in the HVAC market since 2009.

Unfortunately, due to power module component obsolescence, we hereby inform you that the commercial references in our ATV212 200-240 V and S-Flex portfolio in the table below are being discontinued. Schneider Electric endeavored to secure supply of the obsolete part, as well as alternatives. Regrettably we were unsuccessful in doing so for these referenced part numbers below.

Currently, there is not a direct replacement offer for the affected references, however in many applications our Altivar 320, Altivar 630 and Altivar 660 offers may deliver similar, or even higher levels of functionality.

Due to the current high backlog, the end of commercialization date is immediate and effective today, February 10, 2023. Orders submitted up to February 9 will be fulfilled. Please contact your sales representative with any urgent requests for alternative offers to fit your needs.

We understand that this situation may impact your current project deadlines and relationships with your customers, and we appreciate your understanding in this challenging situation.

The rest of the ATV212 and S-Flex catalog references in the 200-240 V and 380-480 V Altivar portfolio products will remain active, and Schneider Electric will continue commercializing them in the U.S (United States). We will honor the warranty period for these discontinued products by providing credit, rather than replacement product if needed in the future.

We look forward to our continued partnership.
