

Magnetic Lightning / iOS Plug Tip

Product ID: 5522

Description

This is a magnetic Lightning / iOS plug! They pair with the Black Woven USB A or Type-C to Type-C Cable with Magnetic Tip. Plug your lightning cable into one end, then insert the little magnetic nub into your device's charging port. Now you basically have a quick-detach Lightning connector with a magnetic alignment. Easy to plug in whenever, no worries if the cable is yanked or twisted.

Works great with any device or cable that has a Lightning port. There are no active components in this adapter; it just takes one port and connects all the pins from one end to the other. Good for data and power

Please note: this tip does NOT work with Magnetic Right Angle USB Type C Adapter – 120W Data and Power.
