

KNIPEX X-Cut®

Compact Diagonal Cutters, high lever transmission
DIN ISO 5749

73

Powerful, light and universal

Cuts fine strands as well as multi-stranded cables and piano wires

- > box-joint design: high stability and lightweight
- > high cutting performance with minimum effort due to optimum coordination of the cutting edge angle and transmission ratio
- > large opening width for thicker cables
- > cuts all wires precisely, even fine copper wires
- > compact, low weight construction
- > double supported joint axis for heavy-duty work
- > universal usage in the assembly, maintenance and production
- > chrome vanadium heavy-duty steel; forged, multi stage oil-hardened

73 02 160

73 06 160

X-Cut®

40 % less effort required

compared with standard diagonal cutters of the same length.
With double mounted hinged joint.

Box-joint design: high stability and lightweight
