Discontinuation of Certain Power-over-Ethernet Products

Dear Brandon,

Please be advised that Phihong will be issuing an EOL notice to all customers next week regarding the pending obsolescence of several different Power-over-Ethernet products. However, I wanted to highlight the below models to you:

POE125U-4-AT-R
POE125U-4-AT-N-R
POE480U-4UP
POE480U-8UP-R
POE480U-8UP
POE29U-560

The EOL notice will provide for a last time buy option, but there most likely will be higher MOQ's/MSQ's.

We do have some inventory available on many of these models. As Digikey has purchased a lot of these models in 2019, we wanted to contact you in advance to see if there is any existing demand with your customer base and to give you first option at the existing inventory.

Please give me a call at your earliest convenience to discuss. Just a soft reminder, that time is of the essence as a formal EOL notice will be sent out to all our customers next week.

Best Regards,

Brittany Schreiber
