

Product Change Notice: Changes on label marking of NMP Series

Date : 2021/01/26

By:Paul Hsu/Product Manager

paul.hsu@meanwell.com

Due to product launch of dual output module card, NMD-240, changes will be made to both label markings in print and DBANMP1K2 and DBANMP650 model labels that are attached on NMP1K2/650 front-ends. Changes will be implemented in two phases:

1. Phase 1, label markings in print add +, - symbols and color blocks to the right side in each bracket, from SLOT 1 to 4/6.
2. Phase 2, model labels add diagram pertaining to dual output module, indicating signal connector **CN82** and tuning direction while using SVRs to adjust output voltage of +V1/+V2.

Should you have any further question, please contact your MEAN WELL sales representative.

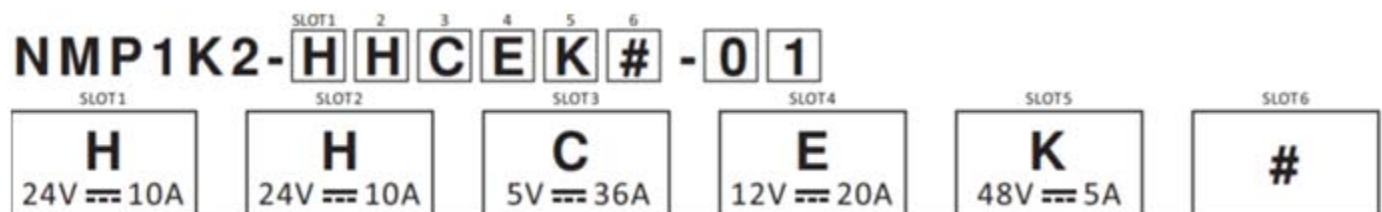

Change in effect:

1. Since Jan. 2021
2. Running change on model labels, P/N: DBANMP1K2 and DBANMP650

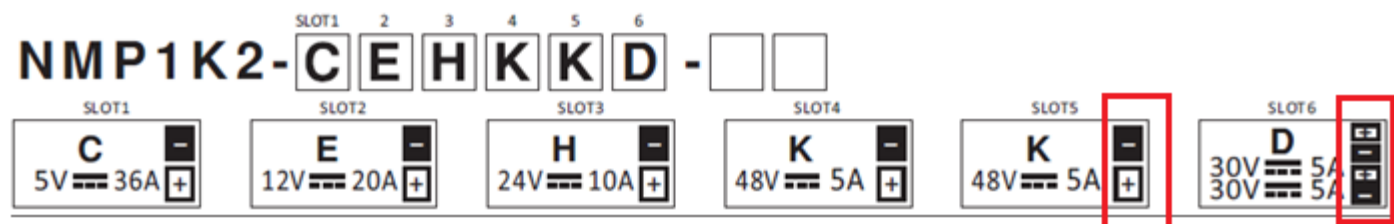

Differences on label markings in print and old vs new version of model labels are as below (NMP1K2 Series for example):

Label markings in print

Before

After : add +, - symbols and color blocks to the right side in each bracket
