Qualification Plan: Please open the attachments included with this PCN labeled as PCN_#_Qual_Plan.

Note: Process technology qualifications will be performed to the MIL-PRF-19500 Standard (TX Level) utilizing Screening Flow plus Groups A, B, C and E, which is the original standard used to qualify these devices.

Appropriate group and subgroup tests are determined by product, package and die characteristics, therefore not all tests may apply. For example, packaging tests would not be conducted for bare die devices, PIND tests are only for packages with a cavity, leak tests are only for hermetic packages, SOA tests are for transistor technology only, etc.

Revision History:

February 19, 2021: Issued initial notification.

The change described in this PCN does not alter Microchip’s current regulatory compliance regarding the material content of the applicable products.
