

Gentherm Automotive Systems (China) LTD.

Compliance Statement for wire color

Dear Customer:

29/Oct/2014

Connector products are divided into two colors,

Red wire is positive function

Black wire is negative function

Root cause of pink wire was a mixing portion was too little to cause the wire to be red, but pink wire is the same as red for positive function.

This is a color issue only and the pink wire has the same function as red.
