DESCRIPTION AND PURPOSE OF CHANGE:

In order to enhance the product reliability, Würth Elektronik will change the carrier tape type for a new version with a stable peel strength for the series WE-GFH size 3225.

Products after product change with effective date of 29th April 2018 are available with Date Code 2018-02-01.

DETAIL OF CHANGE:

Implementing a new version of carrier tape will improve the process of adjusting Pick & Place parameters at the customer side. With improved adhesion technologies, the tape now has a better and stable removal process. Before we experienced deviations in the process of peeling force.

This change is only affected by the series WE-GFH size 3225 with the following article reference "7447649xxx".

The visual difference between the new and current tape will be appreciable with the colour. Next picture shows the colour differences. At the right side we have the new one which is lightly darkened that the current one, at the left side.
