Changes to Lamp Holder Material & Identification for AT600 Lamps & LEDs

Type of Change:

- Engineering Part Number
 Product Appearance

There will be changes for several AT600 lamps and LEDs. The material of the lamp holder base is changing from phenol resin to glass fiber reinforced polyamide. The NKK logo, identification on the bottom of the lamp holder base, will no longer appear. These revisions will apply to the standard AT part numbers specifically outlined below, and include custom AT parts.

Changes for Select AT600 Lamps & LEDs

Part Numbers					Description	Related Series
AT602					Incandescent Lamp	LW Rockers, MLW Rockers, P01 Indicators
6-Volt	12-Volt	18-Volt	24-Volt	28-Volt		
AT602-6V	AT602-12V	AT602-18V	AT602-24V	AT602-28V		
AT602N					Neon Lamp	LW Rockers, MLW Rockers
110-Volt						
AT602N-110V						
AT606					LED	MLW Rockers
AT606C (Red) AT606F (Green)						
AT622					LED	MLW Rockers
AT622C (Red) AT622E (Yellow) AT622F (Green)						

Lamp Holder Base		
Before Change	Material: Phenol Resin Color: Black	Logo: 
After Change	Material: Glass Fiber Reinforced Polyamide Color: Black	Logo Removed

Notes

These changes have no effect on the illumination of the lamps or LEDs.

Lamp holder base color will vary with the change of material; however, the difference will be slight from the previous color and not noticeable.

Contact the factory if more details are needed.

Effective Date

Changes to the material of the lamp holder base and the removal of the NKK logo will be effective October 2018.
