Item description

This counter records binary pulse signals with NAMUR-compliant levels and transmits the counter state to the fieldbus system. The counting direction in “up/down counter” mode can be set using the U/D input. A control byte sets or resets the counter and digital output (DO). Additionally, a limit value can be set at which the DO output is activated when this value is exceeded. The output is short-circuit-proof.

Operating modes:

- Up counter with enable input
- Up/Down Counter with U/D input
- Frequency counter with enable input
- Peak-time counter

Indicators:

- Green LED (status U/D (Gate) + status CLOCK + status DO)

Subject to changes. Please also observe the further product documentation!

- Red LED (error U/D (Gate) + error CLOCK)

Field and system levels are electrically isolated.

Data

Notes

Note	The up/down counter must only be operated via 24 VDC Ex i XTR power supply! General information (e.g., installation regulations) on explosion protection is available in the WAGO I/O System 750 manuals!

Technical data

Number of digital outputs	1
