## Oval Head

Maximum metal behind the blade makes the oval head geometry remarkably durable.

**7140E** Long Handle Semi-Flush

**7141E** Long Handle Optimum Flush

**7142E** Long Handle Lazer Flush

**7240E** Short Handle Semi-Flush

**7241E** Short Handle Optimum Flush

**7242E** Short Handle Lazer Flush

## Tapered Head

A balance of strength and finesse, the tapered design grants better access to tight spaces.

**7143E** Long Handle Semi-Flush

**7144E** Long Handle Optimum Flush

**7145E** Long Handle Lazer Flush

**7243E** Short Handle Semi-Flush

**7244E** Short Handle Optimum Flush

**7245E** Short Handle Lazer Flush

## Tapered Relieved

Sacrificing some durability, this head shape focuses powerful cutting forces into a tiny area.

**7146E** Long Handle Semi-Flush

**7147E** Long Handle Optimum Flush

**7148E** Long Handle Lazer Flush

**7246E** Short Handle Semi-Flush

**7247E** Short Handle Optimum Flush

**7248E** Short Handle Lazer Flush

Built from AISI 52/100 carbon steel with blades induction hardened to RHC 63-65, Excelta's 7000 series are built for peak soft wire cutting performance and are available in a wide variety of configurations. Visit us at [excelta.com](http://excelta.com) to view our **cutter selection guide** and learn about our **reconditioning service**.
