

DISCONTINUED PRODUCT NOTIFICATION

NOTIFICATION DATE: June 8, 2012

SUBJECT: USB configuration option is discontinued for HFX Series I Joysticks

LAST TIME BUY: July 8, 2012

LAST TIME SHIPMENT: September 8, 2012

Dear CH Products Customer,

This letter is to inform you that CH Products is discontinuing the USB configuration option from the HFX Series I Joystick product line. The integrated circuit used for this product has been discontinued and is no longer available from the manufacturer. As a result, this specific option is available for a "Last Time Buy" of July 8, 2012 and a "Last Time Shipment" of September 8, 2012.

Replacing the HFX Series I USB joystick will be the HF Series. Available for immediate purchase, The HF Series features a compact low profile body and provides an under-panel mounting depth that is 50% less than its predecessor. With an install depth just under 1.00", the HF joystick features identical mounting cut-out dimensions and is backwards compatible to all HFX Series I applications. Furthermore, HF Series Joystick provides superior USB performance with greater return to center and less output noise.

If you have questions regarding the discontinuation of the HFX Series I USB option or its new HF replacement, please do not hesitate to contact me at 760-598-2518 or mark@chproducts.com. CH Products has many innovative new products in development and I look forward to writing again soon to discuss these new offerings.

Thank you and best regards,

Mark Petersen
Product Manager
