SUBJECT: LIST OF PHR SERIES PART NUMBER VARIATIONS ASSOICATED
WITH ADDITIONAL MATERIAL SUPPLIER

JST factory has added a new resin supplier and the factory has added alternative part number variations to the existing standard PHR series.

The suffix (L) stands for an alternative material (resin made by KINGFA) used and UL/CSA certified. The performance and quality of all these part numbers are equivalent.

The prefix (D) stands for the manufacturing location in Malaysia.

The suffix (PP) is internal identifier for JST and has no functional meaning for our customers.

Customers could receive any of these part number variations from JST. The prefix and suffix received will depend on the factory and resin used in the manufacturing process, but will have no impact on fit, form or function of the part. The JST part numbers being promoted for this series can be the base part numbers without any prefix or suffix, as it is listed in the JST datasheet.

Please refer to the APPENDIX A for the list of the part number variations.

Thank you,
