Specification Sheet

Part Number: 596-00249

Pre-printed solar labels are made using high-performance UV stable materials and adhesives for long outdoor life.
Designed to meet NEC® and IFC standards for PV installation labeling, the pre-printed solar labels come printed with the most common legends required by the AHJ (Authority Having Jurisdiction) used on

large utility and scaled projects to ensure code compliance during inspection.

Labels are UV stable and made with special high-bond adhesives to stick to both powder-coated painted surfaces and baked enamel surfaces found on most disconnect switches and breaker boxes.

The printed inks meet the fire safety standards of the IFC (International Fire Code) and also meet the requirements of UL969 for high reflectivity and durability.
