## NEW!

### T Series Design Change

#### Summary:

LEMO's T Series, the solution for defense/security, test & measurement, automotive, medical and any other market/application that requires a watertight (IP68) connection, has been enhanced with a few new design features as follows:

- The cable mounted plugs and receptacles now include LEMO's iconic design (as shown below). *Note:* The caps will also include the new pattern as well.
- The TT, OT and 1T latches have increased from two latches to three latches.
- The reverse gender keyway 'J' will be replaced with 'L'.
- This new design is backward compatible with previous designs.
