Date: 3/21/19
END OF LIFE NOTIFICATION

EOL p/n: TFLD546-020.0M

EOL Date: 6/30/19

This represents formal notification that the above reference part number will no longer be available after the specified EOL date. We have identified an equivalent part number that should be considered as a replacement. This End of Life Notification is the result of a normal obsolescence process and also our desire to provide acceptable notification of this event to minimize any adverse customer impact.

A last time buy is available up until the EOL date. The quantity of the last time buy is limited to our available inventory of ~ 50pcs.

Recommended replacement part: TFLD5F-020.0M

Changes in replacement p/n TFLD5F-020.0M:

There is a difference in the function of Pin 2. The pin 2 function of the TFLD5F-020.0M is an enable/disable function (high=enable, open=enable, low=disable), while the pin 2 function of the previous TFLD546-020.0M was N/C. If the customer applies no connection to Pin 2 in their layout, the part will operate fine. The only issue would be if Pin 2 was grounded for some reason in the customer layout, then the new TFLD5F-020.0M would be disabled.

Other than the Pin 2 difference, the recommended replacement part is the same in form, fit, and function as the EOL part.
