

CARRIER BOARD

- DecalPro -

The ideal carrier board to run through a laminator for transferring TRF (Toner Reactive Foils) to toner printed images. Provides a stable, perpendicular contact between upper and lower heated laminator rollers. Delivers maximum heat to reliably transfer foils to toner images.

Also used as an extra carrier board to the DecalPro kit to cut up into smaller boards for faster fabrication of DecalPro dry-transfer images. Cuts easily with any standard paper cutter. Having several sized boards makes processing of images faster.

KIT Contains:

- Fiberglass Board, .020" 8-1/2" x 11"
- Mylar CarrierTRF "Flat Pak", .005" 8"x15"
- Tape Strips (2) to secure Mylar to Board
- Tack Rag
