

Affected Products - RAC04-C

Dear customers and distributors,

we herewith inform you about Product Change Notification concerning the following products:

**RAC04-C/277, RAC04-C/230, RAC04-C, RAC04-C/W
(only 12V models)**

Following a recent factory audit, UL have required us to make changes to the labelling for these series: to use max. input current instead of max. input power and to specify an output rating 333mA instead of 334mA for the 12V output versions.

There is no change to the datasheet, internal construction, specification or actual performance of the converters. Customers already using these converters can continue to use them without any change to their applications. The updated label will be used from the next manufacturing run.

This PCN is issued because the appearance (label) of the converter will change.

20000913	RAC04-12SC/277
20001021	RAC04-12SC/277-E
20000955	RAC04-12SC/230
20000908	RAC04-12SC
20000971	RAC04-12SC/W
