**FESTO**

Festo Core Range  
Solves the majority of your automation tasks

Worldwide:  
Simply good:  
Fast:

Quickest delivery – wherever, whenever  
Expected high Festo quality  
Easy and fast to select

With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.

The Core Range offers you the best value for your automation tasks.

### For manufacturing lithium-ion batteries

ADN-S-...-F1A

Recommended for production facilities for the manufacture of lithium-ion batteries.

Metals with more than 1% copper, zinc or nickel by mass are excluded from use.

Exceptions are nickel in steel, chemically nickel-plated surfaces, circuit boards, cables, electrical plug connectors and coils

### Accessories

Your Festo contact partner can provide information about which accessories are suitable for manufacturing lithium-ion batteries.

1) The minimum pressure values in the retracting direction may be slightly higher after an extended idle time.

2) Note operating range of proximity switches.

3) Corrosion resistance class CRC 0 to Festo standard FN 940070

No corrosion stress. Applies to small, visually unimportant standards-based parts such as threaded pins, circlips and clamping sleeves which are usually only available on the market in a phosphated or burnished version (and possibly oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]									
Information on the operating medium	Lubricated operation possible (in which case lubricated operation will always be required)									
Ambient temperature <sup>2)</sup> [°C]	-10 ... +60			0 ... +60						
Corrosion resistance class CRC <sup>3)</sup>	2									

1) The minimum pressure values in the retracting direction may be slightly higher after an extended idle time.

2) Note operating range of proximity switches.

3) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

Note

The degree of friction depends on the mounting position and the Type of load involved. Single-acting cylinders should as far as possible be operated without transverse loads.

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

2) Deviating dimensions in the case of strokes 5, 10 and 25 → page 35
