## OTFI-0100, OTFI-0105 - Product Discontinuation

---

The OTFI-0100 and OTFI-0105 fiber optic illuminators have been in production for 10 years. After many years in the market, it is inevitable that this product is seeing many of its electronic subcomponents go obsolete. The process of finding replacements has been a challenge over the last few years and has now reached a point where we are unable to source the required components. Therefore, effective immediately, the OTFI-0100 and OTFI-0105 will be discontinued. We will not be introducing replacement products.

Any orders currently confirmed and processed in our system will be fulfilled; however, we are unable to accept any new orders due to unavailability of components.

Discontinued Part Numbers
OTFI-0100
OTFI-0105

If you have any questions about this notice or any OTFI product, please feel free to speak to your account manager or contact me directly. Thank you for your continued support.

Best Regards,

Drew Kruspe  
Senior Product Manager, Biomedical OEM
