## **EZ-SCREEN Update & SC22-3 Safety Controller Discontinuation**

### **Safety Light Curtain Color Change**

Banner is issuing notification that the following Safety Light Curtain platforms will soon begin transitioning from a yellow to a black external housing color. Safety Light Curtain P/N' and Model Numbers will not change, and this color change does not impact any of the regulatory certifications that these products carry. The estimated transition dates are based on supplier process changes and availability of remaining on-hand inventory positions.

<b>Product Family</b>	<b>Estimated Transition</b>
EZ SCREEN LS	Q2 2022
EZ SCREEN Type 4	Q3 2022
EZ SCREEN LP	Q4 2022

### **SC22-3 Safety Controller Discontinuation**

An abrupt supply chain situation has developed creating the need for the immediate discontinuation of the legacy SC22-3 Safety Controller product family. Unfortunately, we will not be accepting any new orders for these controllers. Customers should immediately transition to the SC26, XS26, or the SC10 Safety Controller platform.

Please feel free to contact Banner for any questions or application assistance you may need.

Thank You!
