

Product Change Notification

PCN-PCC-7912-2022

Business Unit	Product Line Code	Type of Change	Action	Date of Issue
PCC - PCB Connectors	AAC	Product Change Notification	Notify Distributors and Field	5/2/2022

The following Phoenix Contact products have been modified. Existing specifications will be met or exceeded. Please review and acknowledge this document and inform your personnel as needed.

Description for Product Change Notification

A supplier for PBT plastics has discontinued the gray (RAL 7042) and beige (RAL 7032) colors that we require for the production of certain product families. Unfortunately, this means that we have been forced to change the insulating material of the items listed in the attachment from PBT to PA with immediate effect. The color changes are within the range of the usual series variations. Due to the material change, the CTI value in accordance with IEC 60112 will increase from 225 to 600. This increases the rated voltage from 250 V to 320 V for (III/3) and from 400 V to 630 V for (II/2). All other documented technical data, dimensions, and approvals remain unchanged.

Stock Status

Can existing stock still be used? Yes
Is mixture of stock acceptable? Other (see below)

OTHER: Due to the nature of this PCN, stock status is highly dependent on the application for which the product is utilized. Customers are advised to review this notification and determine impact on existing stock for the actual application(s).

Transaction Dates

Date modification goes into effect from Germany: 6/1/2022
Expected first shipment (from Phoenix Contact) of the modified products(s): 6/1/2022

Should you have any issues with the timeline or content of this product change, please contact Phoenix Contact using the information below. Customers should acknowledge receipt of the PCN within 30 days of delivery of the PCN; provided, however, that the failure to acknowledge receipt does not affect the product change or the effective date thereof.
