Date: June 19, 2014

June 19, 2014

To: Our Valued Intersil Customers

Subject: **Test Site Change for the Listed Intersil Products** – *KESM Industries BHD*

This notice is to inform you that Intersil is transitioning the final electrical test, tape and reel, and packing operations for the listed products to the KESM Industries BHD (KESM) facility located in Selangor Darul Eshan, Malaysia. The current facility STATS ChipPAC (SCM) located in Kuala Lumpur, Malaysia has officially announced plant closure by end of year 2014.

<http://www.statschippac.com/news/newscenter/2013/news06282013.aspx>;

Intersil will discontinue the use of the current facility, STATS ChipPAC (SCM), upon expiration of this notice and completion of all transfer activities. The product and site-specific verification activities are in progress and scheduled to complete in September 2014.

Products affected:

ISL78600ANZ-TR5573 ISL78600ANZR5573 ISL78600ANZ-T ISL78600ANZ

The KESM Industries BHD (KESM) facility is ISO 9001:2008 and ISO/TS 16949:2009 certified and currently qualified as a primary supplier to Intersil for testing of packaged products. The following summarizes the activities that will be conducted prior to production release to confirm there is no impact to form, fit, function, or interchangeability of the product.

- Intersil supplied test software and product specific hardware will be used at KESM.
- The test equipment validation plan involves the testing of control units and a correlation lot of product at the KESM and current facility. The ISL78600 has been selected as the qualification vehicle for this activity.
 - Control units will be tested at the current test site and retested at KESM, their performance recorded, and the results analyzed to validate the set-up.
 - A correlation lot of approximately 1000 units will be tested at the current test site and retested at KESM. The test results from each site will be compared.
 - Continuous monitoring and comparison of the data from lots processed at multiple sites are an ongoing function of the responsible product engineers.
- The visual/mechanical inspection and tape and reel operations are compliant to JEDEC industry standards used by all Intersil subcontractors.

Product affected by this change is identifiable via Intersil's internal traceability system

Intersil will take all necessary actions to conform to customer requirements and to ensure the continued high quality and reliability of Intersil products being supplied. Customers may expect to receive product tested at the KESM facility beginning 90 days from the date of the notification or upon successful completion of correlation activities.

If you have concerns with this notice, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jeff Touvell
