

# Product Change Notification

## TE Connectivity

Product Change Notification: E-16-014876

PCN Date: 19-OCT-16

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:  
23 Position AMPSEAL Header 776087 776228

Description of Changes  
In an effort to continuously provide quality product improvements, TE manufacturing will be changing the current flange seal material on the AMPSEAL headers in Jan 2017. The new material color will be opaque with the current material being black. The new seal material has a Shore hardness of approximately 40, vs the current Shore hardness of approximately 30, which will allow manufacturing to better control the height and width of the flange seal during application. The new stiffer material will not droop after application to the header flange so the new height will be 1.7 and the width of 2.4 will be maintained. The new material has been tested by Product Engineering and meets all testing described in Product Spec 108-1329

Reason for Changes:	
Product Improvement.	
Estimated Dates:	
Last Order Date (Obsolete Parts Only):	First Date To Ship (Changed Parts Only):
	16-JAN-2017
Last Ship Date (Obsolete Parts Only):	Last Date for Mixed Shipments: (Changed Parts Only):
	No Mixed Shipments
