p: + 353 91 792444  
f: + 353 91 792445

Advantech B+B SmartWorx (IMC Networks) has EOL'd products that no longer fill a need for LANs and WANs. This is certainly true for most 10Mbps products, as well as older designed products that are available now with better features and hardware support; for example, devices with SFP ports and PoE capability.

The purpose of this notification is to advise internal and external customers about part numbers *within* an *active* product family that have been discontinued due to changing market conditions. So rather than issuing EOL notices for some products within a family, it makes more sense to issue a comprehensive spreadsheet which details product families with *only* discontinued part numbers.

All *active* part numbers for each product family remain on our website and in our price lists. If in doubt, please contact us directly.

### Additional Notes:

- **All CWDM fixed fiber products have been discontinued.** The attached spreadsheet does not list all CWDM part numbers by product family, because it would make the list long, and to no purpose, due to lack of sales. Many Fast Ethernet and Gigabit **CWDM SFPs** are still available; our recommendation is to promote the SFP-port version of a product and recommend a CWDM SFP.
- A selective list of **854-xxxxx** part numbers remain **active** (44 SKUs). The remainder of **854-xxxxx** part numbers have been discontinued. These parts are not listed in the price list or on the website. **854-xxxxx part numbers** are the counterparts to 855-xxxxx/856-xxxxx/857-xxxxx/858-xxxxx products packaged *without* external power supplies.

Note: 855/856/857/858-xxxx products are packaged with an AC external power adapter. Please refer to spreadsheet for the active 854-xxxxx parts.

We are in the process of updating our datasheets; during this time our parts offered listed on the datasheet may be out of sync from the website and the pricelist. While we update the datasheets, please use current datasheets as only a source of reference for content and specs, but not necessarily to identify active part numbers. The updated datasheets will be made available on Webdam and our website. The updated datasheets will have the our new re-branded logo “Advantech B+B SmartWorx. In case of questions please refer to the website or contact us directly.

Regards,

Susan Stanley
