6 November 2017

Product Change Notice

Effective November 6, 2017 Ohmite will commence manufacturing TFS Series resistors at our Matamoros, Mexico facility. Prior to this date TFS Series was produced in Switzerland. Other than Country of Origin there are no other changes to product specifications. This change is done in the interest of reducing leadtimes and providing customers with more reliable delivery dates. While usage of TFS Series resistors is low, many of them are used in applications which may require Qualification Samples for the new manufacturing site. Some have already been supplied and qualified. Should any existing user require samples please contact Ohmite Customer Service to execute a sample order. Between the date of this announcement and the end of 2017 customers may receive TFS Series from either location, as our supply chain ships the last of the open orders we have with them.

Best Regards,

Brandon Metzger
Product Manager

CC: Kirk Schwiebert
Director of Product Development
