

# Product Change Notification

## TE Connectivity

Product Change Notification: E-15-003430

PCN Date: 22-MAY-15

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:  
CST-100 housings and contacts

Description of Changes

Dear Customer, in order to provide a continuous improvement on our product offer we are announcing that we are going to supersede CST-100 housing and contact with CSTII-100 housing and contact series as per the below part number cross reference list. CSTII .100 series is the next generation of CST .100 with improved contact retention on connector cavities and improved Locking Lance Window for an easier inspection. These connectors will mate with specified MTA-100 headers, notched headers, and CST-100 shrouded headers therefore this will not affect the MTA-100 and CST-100 shrouded headers on the board side of applications. CST-100 II Connectors are NOT interchangeable with CST-100 contacts and housings. CST-100 II Connectors are Listed by Underwriters Laboratories Inc. (UL) in File E28476, and Certified by CSA International, in File LR7189. Hi Volume, application tooling for CST 100 II will remain the same as CST100 (for reference you can consult Application spec. 114-13036).
