# Welder Limiters
Class H and J Fuseholders

68000 & 64000
Series

General Information:

- Current-limiting devices designed specially for use on welder circuits only.
- Time-current characteristics are designed to hold on the intermittent overloading encountered in welder operation, while providing short-circuit protection to the circuit and equipment.
- Welder limiters have excess current capacity in the operating range as needed for this type of service.
- Because of the special characteristics of the welder limiters, they are not intended for application on general-use circuits.

Dimensional Data

Catalog Symbol: 68150, 68200, 68300, 68400, 68600, 64200, 64300, 64400, and 64600
Welder Limiters
Voltage Rating: 600 Volts AC or less; 200,000 AIC
