

March 3, 2022

Dear Valued Customers and Partners,

Intel has made the decision to discontinue 3 Intel® Programmable Acceleration Cards (PACs) including: Intel FPGA PAC N3000, Intel PAC D5005, and the PAC with Intel® Arria® 10 GX FPGA. These PACs will be discontinued per the schedule below. This discontinuation will affect all orderable part numbers for these PAC cards. Please see the attached list of affected part numbers.

These PACs are manufactured with components from many suppliers. The global supply challenges are impacting the manufacturability of these cards. Additionally, Intel's next generation SmartNIC platforms and their derivatives are becoming available in 2022 making this a natural transition point to our next generation solutions.

This letter is a pre-notification that Intel will discontinue the PAC products listed above. We are issuing a product discontinuance notice on March 11, 2022, with key milestones as below:

Milestone	Planned Dates
Product Discontinuance Notice Issuance	March 11, 2022
Last-Time-Buy	July 11, 2022
Last-Time-Ship	March 10, 2023 (contingent on supply availability) *

* Note: as global supply chains vary day to day, it is difficult to predict supply and ultimate shipments. These supply variances may limit product availability and force product to ship after the Last-Time-Ship date.

Should you have additional questions or require more information, please do not hesitate to contact your Intel account manager.

Sincerely,
