

PCN Notice

The JF08 series cable assemblies will have a change in cable material supplier and manufacturing location. All existing JF08 series part numbers will be changed to a sales status of pending obsolescence, and will be replaced by a new alternate part number. Limited quantities of the existing JF08 part numbers are still available for order, so please contact your JAE account manager for more information on available quantities. Once the current inventory of existing JF08 part numbers are depleted, all orders will need to be for the new alternate part numbers.

Pending Obsolescence Part Number	Alternate Part Number	Pin Count	Cable Length (cm)
JF08R0R041020MA	JF08R0R041020UA	41*	20
JF08R0R041030MA	JF08R0R041030UA	41*	30
JF08R0R041040MA	JF08R0R041040UA	41*	40
JF08R0R051020MA	JF08R0R051020UA	51	20
JF08R0R051030MA	JF08R0R051030UA	51	30
JF08R0R051040MA	JF08R0R051040UA	51	40

Please make note that the new Alternate Part Numbers for all 41 pin count assemblies will not be available for order until August 6th, 2018. All 51 pin count alternate part numbers are available for order immediately.

Changes to new alternate parts:

1. The raw cable supplier will be changed but the specifications and overall dimensions of the cable and assembly will remain the same.
2. The color of the outer insulating layer on 1 side of the cable will be all black. The previous version of the cable was white.
3. The final cable and connector assembly location will be changed from a JAE manufacturing facility in the Philippines to a JAE manufacturing facility in China.

If you have any questions regarding this matter, please contact your JAE account manager.

Thank you for your cooperation.
